

## Pushing to your git account

Monday, March 7, 2022 2:08 PM

The screenshot shows the GitHub user interface. On the left, a dropdown menu is open, showing options like 'Signed in as vivekduttamishra', 'Set status', 'Your profile', 'Your repositories', 'Your codespaces', 'Your projects', 'Your stars', 'Your gists', 'Upgrade', 'Feature preview', 'Help', 'Settings' (highlighted), and 'Sign out'. A green arrow points from 'Settings' to the 'Developer settings' link in the left sidebar of the 'github.com/settings/profile' page. In the sidebar, 'Developer settings' is circled in red. A red arrow points from 'Developer settings' to the 'Personal access tokens' option in the main content area. Below this, the 'Personal access tokens' page is shown, with a red arrow pointing to the 'Generate new token' button. The 'Generate new token' button is highlighted with a red box. Below the button, there is a 'Note' section with a red arrow pointing to the 'Token for My Personal Computer' input field. Another red arrow points to the 'Expiration' dropdown menu, which is set to 'No expiration'. A yellow box at the bottom contains the text: 'GitHub strongly recommends that you set an expiration date for your token to help keep your information secure. Learn more'.

Token for My Personal Computer

What's this token for?

Expiration \*

No expiration

The token will never expire!

GitHub strongly recommends that you set an expiration date for your token to help keep your information secure. [Learn more](#)

### Select scopes

Scopes define the access for personal tokens. [Read more about OAuth scopes.](#)

- ☒ **repo** Full control of private repositories
- ☒ **repo:status** Access commit status
- ☒ **repo\_deployment** Access deployment status
- ☒ **public\_repo** Access public repositories
- ☒ **repo:invite** Access repository invitations
- ☒ **security\_events**

Make sure to copy your personal access token now. You won't be able to see it again!

Macbook Access Token — repo Last used within the last 3 months

⚠ This token has no expiration date.

## Important

- The token will be visible only once. Please make a copy of it
  - You will also need it only once
- If you miss it, you may always generate a new token
