

Assignment 7.1

Tuesday, March 15, 2022 2:56 PM

- Write a function to check if a given number is prime or not isPrime
- A prime number is not divisible by any number between 2 - (n-1)

```
isPrime(29) ; // -> true  
isPrime(39); // -> false
```

- Also write another function that can return an array of prime between a given min-max range

```
findPrimes ( 1, 10) ; // [2,3,5,7 ]  
findPrimes(20,40) ; // [23, 29, 31, 37] ;
```

- How many primes are there between 2 and 500000?
