

Traditional Application Development

Wednesday, March 9, 2022 4:43 PM

Deployment on the server

- Written in languages like
 - C#
 - Java
 - PHP

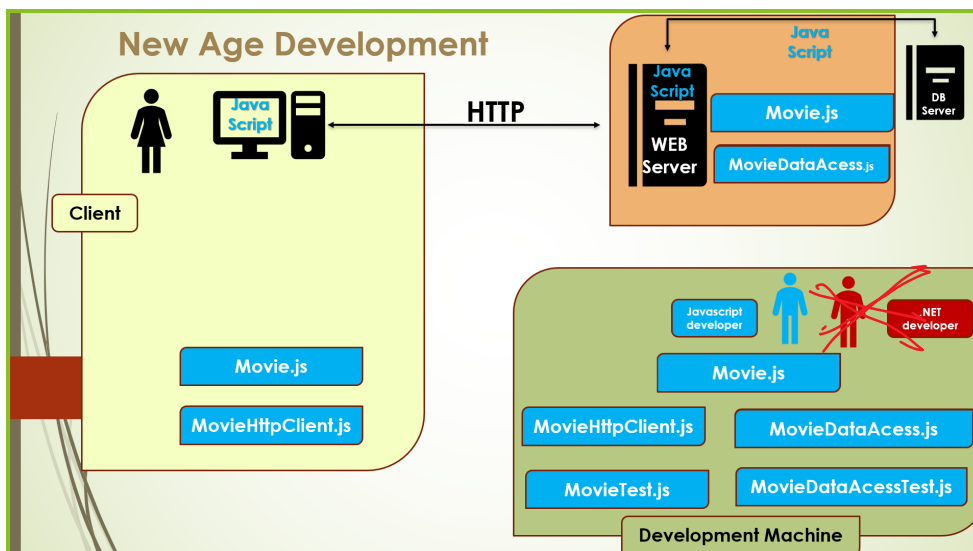

Developer developing the code

- Needs all technology exp technologies used on eith server
- Also needs tests

- Client machine where UI will be present
- Written in Javascript+HTML+CSS

Learning And Maintaining code in different technologies can be difficult

Javascript End to End Development Model

- One Technology
- One Developer
