localStorage

Wednesday, March 16, 2022   6:45 PM

1. To add an object or an array

```
localStorage.setItem( "key", JSON.stringify( obj));
```

- Saves this data which will be persisted in current browser for current web address

2. To get the data back

```
let json= localStorage.getItem('key');

let obj= JSON.parse(json);
```

3. Clear all values from storage

```
localStorage.clear();
```
