Assignment Day 13

Friday, March 25, 2022   4:46 PM

1. Create If-else component with following consideration

Use Case #1 — True condition as children, no else block

```
<If  condition={  a > b } >

    <p> true </p>

</If>
```

Use Case #2 —   then and catch render function

```
<If condition={a>b}
    then = { () => <p> true</p> }
    otherwise={ ()=><p>false</p> }
/>
```

- Otherwise is optional

```
<If condition={a>b}
    then = { () => <p> true</p> }
/>
```

Use case #3 — then as children else as otherwise

```
<If conditon={a>}
    otherwise={ ()=><p>false</p> }
    >
    <p>true</p>
</if>
```

2. Create the Clock component again using Functional components

3. Complete BookListScreen and BookAddScreen

- The two screens should match the output as per the website: http://ca-booksapi.herokuapp.com/

- You should show a wait animation while we are waiting for the output to come

- If no book matching the isbn is found, you should redirect to NotFoundPage

  - Error screen should include the isbn number that is not found.

- Create non-working UI for

- BookAddScreen
- UserLoginScreen
- UserRegisteration Screen

- BookAddScreen
- UserLoginScreen
- UserRegisteration Screen
